IT Consulting Services and Software Solutions Proposition from Gateway Solutions, Inc.

1) Executive Summary

Gateway Solutions, Inc., having perused and with hands on experience on web based systems and providing web services, is geared to develop web based dynamic web portals. Gateway Solutions has acumen of web projects on collaborative web solutions for digital dashboards, eCommerce, sales and logistics, web promotions, eCommerce, content transcription etc.

2) About Gateway Solutions Inc.

Gateway Solutions Inc. is a leading software and business solutions company based in Overland Park, Kansas and having offices in Ashburn, VA and Morrisville, NC. Gateway Solutions has been providing a full complementary range of multi-disciplinary solutions through a 24x7 Global service model. Gateway Solutions is powered by a strong, qualified workforce updated in par with the cutting edge technologies.

2.1 Facts about Gateway Solutions:

Established in 2000

ISO 9001: 2000 Conformance

CMM Level 4 Implementation

2.2 Technical Expertise

Architectures:	Microsoft .NET, J2EE, J2ME, WAP, Conceptual and Concrete Linux Kernel Architecture, USB/FireWire, xDBC, LAN/WAN, TCP/IP Suite.
Platforms and OS:	Major Unix Flavors from AIX, Linux, Solaris and SCO, VxWorks, pSOS, MacOS, IBM OS x00 etc on IA32, RICS (SPARC and PowerPC), Palm OS
Application Servers / Middleware:	BEA Weblogic, Microsoft Transaction Server and Message Queuing, IBM WebSphere, MQSeries, ATG Dynamo, BroadVision, Vignette, Interwoven, InterShop.
Streaming Technologies	Implementation of Real Helix streaming server and producing multi-channel audio over Windows Media 9 series Servers and predecessors. Can implement streaming solutions using VLC Media players and BitTorrent software APIs.
Distributed Object Technologies:	Rapid Tool, COM/DCOM, CORBA, Enterprise Java Beans (EJB)
Databases:	Oracle, MS SQL Server, Berkeley DB, PostgreSQL, MySQL, Informix
Modeling/Programming Languages/Tools:	Embedded SQL, Assembly (Motorola, Intel x86), C, C++, Java, Visual Basic, Delphi, UML, Compiler Tools Chain from Green Hills, Architectural Simulator, Instruction set simulator, SPA, In Circuit Simulation, Logic Analyzers, JTAG Emulation, ROM Emulation (NetROM from AMC), MiniMON29K.
Server Languages:	Active Server Pages (ASP), Servlets, Java Server Pages (JSP), CGI/Perl, Allaire Cold Fusion
GIS Technologies	ArcGis, ESRI, Small World
Mobile and Internet Security Servers:	Microsoft Mobile Information Server, Microsoft Internet Security and Acceleration Server
Markup Languages:	HTML/DHTML, XML, WML
Scripting Languages:	JavaScript, VB Script

2.3 Services

E-Business - With the combination of our in-depth domain knowledge and technical expertise we have successfully developed an exhaustive range of e-Business services. Gateway Solution's prospective clients could find a solution for every e-need -from Online Retailing to Business Intelligence.

Web Development - From designing high profile websites to providing programming, interactive features, security and web databases, Gateway Solutions offer a host of services for building web presence and help Gateway Solutions's clients harness the Power- of the Internet.

Mobile Strategies – Deploy Mobile server gateways to synchronize Mobile devices with Office files from MS Exchange server simulating Corporate Mobile-Office by leveraging liberating Mobile Technologies.

Offshore Development - Gateway Solutions is well equipped with the latest infrastructure, the best available technical skill set and expertise in major domain areas. Gateway Solutions does also have the experience of remote development of solutions spread over the world on a 24x7 availability.

Managed Hosting - Hosting services provided at Gateway Solution's world-class data centers connected with OC 48 links span through dedicated servers and co-location servers including mirroring and hosting for high bandwidth usage sites.

Shared Hosting - For registering Domains, Hosting, Dedicated Servers, Website Promotion, and Maintenance using Credit Cards.

E-Payment Processing - Gateway Solutions does also offer digital payment processing solutions starting from payment gateways, online credit card processing, and digital certificates and managed security services.

Gateway Solutions service offerings, apart from these, include: Secure Data processing, Consultancy Corporate Accounting Services, HR Solutions, Payroll Services etc.

2.4 ManPower

Gateway Solutions prepossesses some of the best professional teams in its areas of specialization. These include:

- Project Management Architects
- Application and Product developers
- Network/Server administrators
- Web Masters
- Banking software analysts and developers
- E-Commerce and online security specialists
- Mobile Applications/Solutions
- Product Development teams with hyper-programmers
- Business Process Analysts
- Customer/Product support and CRM

The Professional teams receive support from three external partnership arrangements:

- Networking with advanced institutions in science, technology, management, finance and IT for domain expertise consultation.
- A Local Network of professional pool to augment human resources on call.

2.5 Quality Process

Gateway Solutions has a full-fledged QA team that ensures, through rigorous testing, ISO compliant processes and qualitative output of all applications/products that are being rolled out.

2.6 The Mission, Gateway Solutions's

To deliver on-time every time, qualitative and innovative software solutions that extend clients with competitive advantage in their functional areas.

2.7 Project Management

Gateway Solutions's highly dexterous project management skills have been institutionalized in the form of Project Management System, which functions as a single point protocol coordinating various departments to facilitate smooth project management, across all the phases of the project, and also act as a knowledge repository and a foundation for Best Practices.

3) Scope and Overview of Solutions

To achieve Client objectives pertaining to the development of effective software with improved features, Gateway Solutions shall turn it out, deploying its ISO 9001 certified processes and pertinent technologies & personnel.

Gateway Solutions does prepossess vast experience in web solutions/services and fully understands the impact of a well designed and systematically programmed software.

With technical expertise on

- Microsoft Technologies hosting featuring comprising of IIS, ASP, MS SQL, MS Access, Visual Studio, .NET framework, MS Exchange Server software tools. Online streaming solutions on Audio/Video with highest compression coding techniques.
- Linux hosting featuring PHP, MySQL, Apache, TOMCAT software tools. On banking, insurance and mortgage solutions we use J2EE frameworks for efficient and robust functionality of the online business portal.
- MAC graphics creation for animations, eCards, greetings, logos, product page designs etc., using state of the art technology software.

4) Methodology

Discovery

With its Onsite/Offsite Management team, Gateway Solutions interacts with Clients during the initial stage to discover and understand the software related requirements. This involves defining Client intended users, formulating a statement of the software's and solution purpose, and objective, and gathering flow information. The complete specifications for the Intranet, Internet solution are gathered during this phase.

Initial Development

Gateway Solutions sets out to develop, deployment of the software/servers as per specifications from Client.

Approval By Client

After the initial version is prepared, Gateway Solutions presents it to the Client for modification and approval.

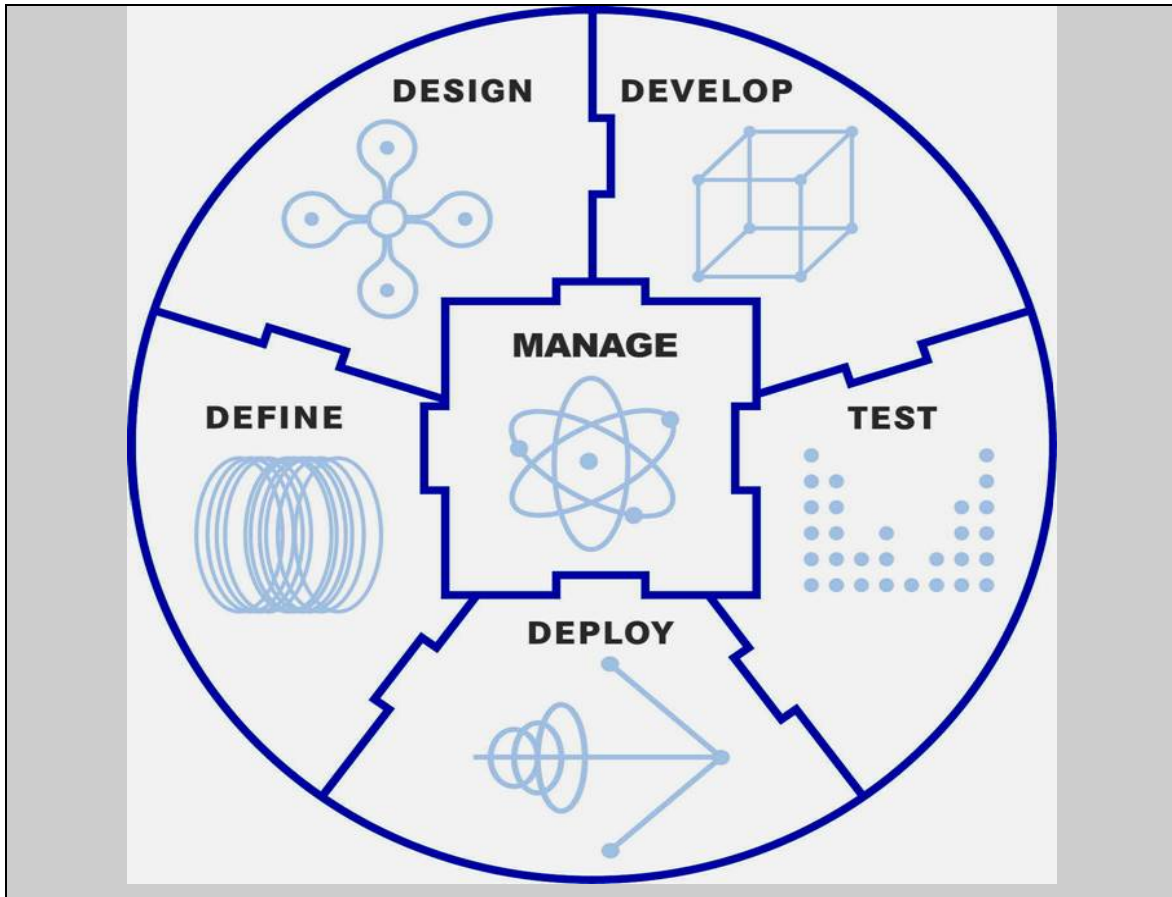

Incorporation of changes

Based on inputs from client, Gateway Solutions's developers/designers implement changes, modifications and redesigning requests as specifications mentioned.

Quality Testing

Gateway Solutions's Quality Assurance Team would take up stringent quality measures that ensure all the processes to be in conformity to the ISO standards. A final quality check would precede the final delivery made to the Client.

3.4 Gateway Solutions: Methodology

5) Project Plan And Commercial Offering

5.1 General Activities and Deliverables

Activity	Deliverable
Discovery	URS document
URS & SRS Documents	Submit for Approval by Client
Develop/Deploy as per specifications	Fully functional Output
Testing	Prototype and Testing with features as per specifications
Final changes	Final delivery

5.2 Timeline for Implementation:

The timeline and deliverables dates will be fixed after the approval of the features from both the ends. The timelines may vary based on the changes/upgrades of the requests from the Client. The timeline will be fixed on number of man-days a resource will be utilized for the project.

Phase Names	Days
Total	Days

5.4 Commercial Cost Offer:

The Commercial offerings will be fixed based on the time, material and resources utilized for the implementation of the Solution. The hourly billing of each resource service will be added together to arrive at a fixed cost quotation of the project.

We provide two weeks of support after launch of the software. We provide Annual Maintenance service for easy updates of any changes requested and for easy maintenance and database backup features etc.

We provide hosting/domain registration services with the lowest price and best up-time service in the market. We host you with the 99.90% uptime services and 24/7 support. Assumptions And Dependencies

6.1 General

Gateway Solutions, at the outset of the project, must receive all corporate standards, requirements and current brand and member documentation from the Client.

An Overall Manager, in order to be available throughout the project for approvals, questions, issues etc., has to be identified by The Client and duly communicated to Gateway Solutions.

The time restriction of the project requires that all approvals should be completed within 24 hours of document delivery. Gateway Solutions will look to schedule all client approval and meetings in the morning or evening hours and expect signed return of deliverables the following day in the morning or the evening if that is the case.

6.2 Cost Estimates and Billing

The costs in the proposal will be fixed based upon specifications deliverable from the Client. In case of major changes in the scope of the project, Gateway Solutions will notify The Client immediately and both parties will agree to the price adjustments.

Any work added to or deleted from the scope that is not outlined in the Scope of Work will affect the schedule and budget.

Approved documents, deliverables and milestones will not be altered after final sign-off.

6.3 Project Administration

The client and Gateway Solutions Technologies will each establish a single point of contact for each team. All decisions/approvals will be made through these two individuals.

Gateway Solutions point of contact is Kemp Kamakoti, and the Client point of contact will be the Overall Manager appointed by the Client.

The Client's point of contact or Overall Manager will be considered by Gateway Solutions to be the Project Acceptor. The Project Acceptor will have responsibility for responding to any change requests for sign-off documents issued by Gateway Solutions. The Project Acceptor must respond and sign off to those requests within 24 hours.

The Client will provide sign-off for each individual deliverable as it is completed. A separate sign-off covering the entire project will also be provided.

The time estimates provided in the project timeline are contingent upon the cooperation of the Client project team, as well as the timely receipt of assets and approvals from the Client or its interactive partners. Any delays could affect delivery and costs.

Gateway Solutions will provide weekly activity and deliverables updates and will report any potential problem that can risk the project timeline and cost.

6.4 Technical

The purchase and licensing of any required hosting service, application server, communication server, hardware or any other software (not specifically programmed by Gateway Solutions) will not be included in the proposal.

At an additional cost, Gateway Solutions will be responsible for including, but not limited to, security, backups, and maintenance of client software/information.

Gateway Solutions agrees to fix any bugs found for the period of two (2) months after Acceptance Testing.

This plan does not include modifications to the software by Gateway Solutions that may become necessary if, during the project, the development platform hardware or software requirements change.

Gateway Solutions does not assume responsibility for any issues or problems that may be encountered from the use of other-party installed packages.

The Client will provide Gateway Solutions with all technical documentation for review and assessment.

The Client will instruct Gateway Solutions on current technical standards and constraints in creating this site.

The Client and Gateway Solutions will work jointly, in good faith, to document the technical interfaces and responsibilities for the project. These will be concluded during the Initial phase and, once defined, changes to these agreements will be considered as a change request for the project.

The entire project is assumed to be executed by our professionals at Gateway Solutions's premises in USA/INDIA. Any onsite implementations identified by both parties will take place in Gateway Solutions's facilities.

The Client will work to make any external legacy system access required during the development and testing of this project available during the time required on "high availability", preferably 24 / 7 basis.

Any required unique naming conventions will be provided to Gateway Solutions in a printed document within frames specified in the Project Plan.

All software and product partners, if any, will be responsible for testing their own deliverables.

6.5 Creative

The Client will be responsible for providing Gateway Solutions with electronic files and all logos, product images and data for content as required. In the event Gateway Solutions is required to digitize assets, the project budget and timeline may be affected.

All design and content will follow Gateway Solutions's online branding standards.

Rights to any items that are contained in this project (such as, but not limited to, original artwork or photography) and are from sources outside Gateway Solutions are only granted for use in this project unless specified otherwise in writing.

All textual content must be received in an electronically usable format (i.e. Word and PowerPoint).

6.6 Terms & Conditions

Force Majeure

- a) Where an event of Force Majeure occurs in relation to either party which affects or may affect the performance of any of its obligations under this agreement, it shall forthwith notify the other party as to the nature and extent of the circumstances in question.
- b) Neither party shall be deemed to be in breach of this agreement, or shall otherwise be liable to the other, by reason of any delay in performance, or the non-performance, of any of its obligations under this agreement, to the extent that the delay or non-performance is due to any Force Majeure of which it has notified the other party, and the time for performance of that obligation shall be extended accordingly or withheld at its absolute discretion.

Gateway Solutions will assign certain IT professionals for work to be carried out under this contract. The names of these professionals will be provided to the Client in advance and these resources shall continue work on this project till completed. If any alternative resources are to be assigned, client will be notified in writing in advance.

Client will provide all its requirements in written form to be signed off by Client as well as Gateway Solutions. Clearly documented specifications will eventually result in a smoother development effort, thus reducing the development time and cost incurred by the Client. This documentation may be prepared by Gateway Solutions but will be signed off by Client.

The cost specifications etc, that are being quoted in this proposal, would be valid for a period of 6 months

Client will also convey any changes in specifications to Gateway Solutions in writing in order to ensure clarity in specification change and to reduce chances of non-conformity with Client requirements.

Any changes in specifications for fixed cost projects during the course of the Project will require extra hours beyond the estimates quoted above. These hours will be billed extra separately over and above the quoted fixed cost on basis of actual hours used at the rates given above.

Client will provide at its cost the items required for the project. These materials could be either software or hardware, as listed. The IT professionals at Gateway Solutions will utilize the materials exclusively for carrying out the development work assigned by Client. These items will remain the property of Client and will be collected at the end of this Project by Client at Client's cost. Gateway Solutions will take all reasonable care to use these materials in a reasonable and appropriate manner but cannot be held liable for any wear and tear or damage to such material.

The relationship between Gateway Solutions and the Client will be that of Service Provider and Client. The parties shall not be construed as being engaged in a joint venture.

6.7 Areas of Specialization and Expertise:

GSI Provides IT services both as turnkey project solutions and on demand staffing basis.

GSI IT consulting services provides experienced individuals with expertise in latest operating systems, programming languages and tools, database management systems, web development tools, web servers, network protocols and data standards, and e-commerce platforms. Our IT Consultants continually keep abreast of the latest advances in these areas in order to offer the best solutions for your company's needs.

Operating Systems

- Windows 2000/NT/9X/ME/CE
- Unix (BSD systems, Solaris, HP-UX, Linux, Sco,etc.)
- Embedded systems (Windows CE, Palm OS, etc.)

Programming Languages/Tools

- MS Visual .NET Platform.
- C++ for Unix with development kits
- C / Visual C++, UNIX, PERL, CGI, Active Perl
- Java, JSP, JavaScript, Java IDEs, Swing, EJB, Servlets, Applets, CORBA, RMI
- ASP.NET, ASP, VB.NET, VB, C#
- COM/DCOM, Visual Basic, Crystal Reports
- LISP, AutoLisp
- Debugging Tools (Soft-Ice, BoundChecker, etc.)
- Performance Tuning Tools (Jprobe, OptimizeIt)
- GNU Tools, Cygwin
- Rational Rose, TogetherJ
- Dexterity (Great Plains)

Quality Assurance and Analysis

Mercury Tools:

- WinRunner
- LoadRunner
- Test Director
- Quality Center
- Quick Test Pro

Rational Tools:

- Rational Requisite Pro
- Rational Test Manager
- Rational Robot
- Rational Clear Case

Database Management Systems

- Oracle, MS SQL Server, MySQL, FoxPro
- Informix
- MS Access
- InterBASE, Sybase

Data Warehousing / Business Intelligence

- Informatica: PowerCenterRT, PowerCenter, PowerMart, PowerChannel, PowerConnect, PowerAnalyzer, Cognos: ReportNet, Powerplay, Powerhouse
- Business Objects: Analytic Applications, Query, Reporting Analysis, Information Delivery, BI Deployment, Data Integration, Microstrategy, Datastage, Brio
- MS SQL Analytics

ERP/CRM/EAI

- Oracle, SAP, PeopleSoft, Great Plains, JD Edwards
- Siebel, Vantive, Clarify
- Vitria

Web Development/Design Tools

- JSP, ASP, CGI, PHP, Java Servlets/applets
- ISAPI server extensions and filters
- Macromedia Dreamweaver
- MS Front Page
- Macromedia Flash
- Adobe InDesign
- Cold Fusion, HTML, DHTML, SML
- Director Visual Studio
- Visual Source Safe
- Symantec Visual Cafe

Web Servers

- MS IIS
- Apache (under NT and Unix)
- Apache Jserv, Tomcat (under NT and UNIX)
- Netscape Enterprise Server MS - Internet Information Server Rational Rose
- XML, SGML, WML
- WebSphere, WebMethods, Domino, BEA WebLogic, Tomcat
- SharePoint Portal

Network Protocols and Data Standards

- TCP/IP, ICMP, SNMP
- HTTP 1.1, WebDav, LDAPv3
- SMTP, POP3, PAP/CHAP, NPP, NNTP, etc.
- XML, XSL, RDF, P3P
- OpenPGP, PKCS, SPKI, IPSec, SMIME, PKix

Wireless Technologies

- WAP, Nokia Server
- WapLite, YoSpace, GPRS

- 3G WAP Services

E-Commerce Platforms

- CyberCash merchant interface
- Cyber Source
- Open Market merchant and financial institution interfaces
